"The acknowledgment as leader of the science dissemination area for many years makes me happy. Especially that part has been very enjoyable, as it has favored several scientific contacts and has allowed me to get to know many people I would have never met otherwise."

Dr. Tiziana Venturi, Director of INAF/IT, RadioNet Board Chair and previous leader of the scientific dissemination activity

"My motivation in RadioNet is to provide students and young researchers opportunities to expand their knowledge in radio science and give hands-on experience with practical work in radio astronomy."

Dr. Silja Pohjolainen, Docent (adjunct prof.) of the University of Turku/FI & RadioNet Board member

"Everything you learn is adaptable and valuable."

Prof. Carole Jackson, Director of ASTRON/NL & RadioNet Board member

"RadioNet plays a huge role accessible regardless of anything else, and in bringing staff together to learn from

Dr. Anita Richards, astronomer at the of the RadioNet Training activity.

in making radio astronomy gender, nationality or astronomers, engineers and all each other."

University of Manchester/UK & leader

"RadioNet offers a unique opportunity to interface with other observatories, engineers, astronomers. As electronic engineer working at ESO for ALMA, I believe that is essential to share experience and develop the radio-astronomy facilities that allow the ongoing and future discoveries."

Dr. Caroline Jaillot, Electronic Engineer at ESO/DE & leader of the RadioNet Staff Exchange activity.

"I am working on a project to store and process e-MERLIN data on the cloud in order to facilitate reproducibility and make radio astronomy more accessible to all."

Dr. Rachael Ainsworth, Researcher at University of Manchester/UK & active member of RadioNet JRA.
